## OBJECTIVE

Acquiring a productive meaningful job. Where I can improve my skills and help in building and/or maintaining software with cooperative work.

## EXPERIENCE

2021 – 2022

**FREELANCE SOFTWARE DEVELOPER**, IN ADEN YEMEN

I developed apps for small businesses. Some apps were full stack applications, while, some were front-end or pc Apps. Here is a link to one I was recently working on:

<https://www.caveofwishes.com/>

2018 – 2020

**COMPUTER SCIENCE STUDENT**, UNIVERSITY AT BUFFALO

Work on multiple school projects. Used the popular technologies to build projects. Such as, Django, and flask as a backend, and ReactJS as a front end. Work on project alone and with teams. We used GitHub as a version control for our projects. Practiced some of the popular methods when build our projects, such as Agile method, waterfall design, and prototyping.

## EDUCATION

01 2021

**BACHELOR OF SCIENCE COMPUTER SCIENCE**, UNIVERSITY AT BUFFALO

Learned all that is needed to work in the field of computer science. Such as, full stack development using agile methodology, cooperative work with team members, learned the mathematical theory of computation, algorithms and computer security and ethics.

01 2021

**MINOR IN PSYCHOLOGY**, UNIVERSITY AT BUFFALO

Learned the fundamental theories of psychology. Obtained the skills to read and understand research in the field of psychology, especially in the field of developmental psychology.
